## PROFILE

**Senior BI Engineer** with deep Data Engineering roots, with 8+ years building dashboards, automated reporting, and the SQL/ETL infrastructure beneath them. Currently focused on **Power BI, SQL Server, Azure Databricks** (incl. **Databricks SQL**) and **Power Automate**; earlier in the same role, **PySpark** on the medallion pipelines. Years of analysing **event-level operational data** across a national distribution network: sequence, stage-by-stage drop-off, SLA per hop.

## TECHNICAL SKILLS

**Visualisation & Reporting**
Power BI, Qlik; quick adaptation to other BI tools (e.g. Tableau).

**Data Engineering & ETL**
SQL, Azure Databricks (incl. Databricks SQL), Azure Data Factory, Power Automate, SSMS, SSAS, Excel (VBA), Python, PySpark, Git, Azure DevOps.

**Methodologies**
Agile (Kanban), CI/CD, Data Warehousing, Data Modeling, Data Governance.

**Agentic AI**
Claude Code, Cursor, Microsoft Copilot, Gemini, ChatGPT.

## LANGUAGES

English C1 · Spanish B1

## SELECTED WORK

danielapatricio.github.io
· Power BI RLS at 10,000+ B2B clients
· Operational Alarms system
· Pokopia Habitat Planner

## INTERESTS

Beagle training · indoor plants & herb garden · Japanese language and culture · video games · cross-stitch.

## PROFESSIONAL EXPERIENCE

### Senior BI Engineer

*CTT — Correios de Portugal* · Lisbon · Sep 2020 — Present

- Built and maintained data products on a **medallion-style architecture** using Azure Data Factory, Azure Data Lake, Databricks, and SQL Server (Databricks SQL for internal self-service). Authored **Databricks notebooks (PySpark and SQL)** reading parquet landed in the lake by Data Factory and transforming it from raw through stage to curated, plus new dimensions and extensions to existing fact and dimension tables.
- **Co-owned the operational data pipeline** sourcing **event-level delivery data** (every object emits events at each network stage) into Power BI and broader analytics, with **Grafana** for monitoring + stage-by-stage reconciliation, plus failed-run triage, debugging, and ongoing reliability.
- Built **centralised data warehouse structures** supporting decision-making across **20+ departments and 500+ stakeholders**, including executive leadership.
- Designed and deployed an **Operational Alarms system** with near real-time data streams (Power Automate) supporting proactive service-quality actions.

KEY RESULTS

- ✓ Architected **Power BI Row-Level Security** for the Quality of Service multi-tenant data product, embedded end-to-end on CTT's website: custom user-to-data dimension via `USERPRINCIPALNAME()`, coordinated with site authentication. **10,000+ users** at time of build.
- ✓ Authored the **#1 and #2 most-viewed Power BI reports across CTT** (and most of the top 10 overall) on the company's Power BI server.
- ✓ **Net Promoter Score (NPS)** dashboard used by executive leadership and shareholders to guide strategy.

### Data Analyst

*Audiogest / PassMúsica* · Lisbon · Jan 2019 — Aug 2020

- Designed, optimised and maintained **SQL-based ETL processes** and Power BI data models, centralising data from Management, Operations, HR and Legal.
- Automated reporting pipelines and refresh cycles, improving reliability and reducing manual maintenance.
- Defined and documented KPIs and data structures in collaboration with stakeholders, aligning analytics with business objectives.

KEY RESULTS

- ✓ Reduced reporting workload by **100+ hours per year** through SQL optimisation and automation.
- ✓ Streamlined **Rights Distribution** data processes, improving accuracy and timeliness for management reporting.

## PROFESSIONAL EXPERIENCE (CONT.)

### Business Intelligence Consultant

*Multivision (project at Nokia)* · Lisbon · Mar 2018 — Aug 2018

- Collaborated with Sales, HR and Product teams to design Power BI dashboards and datasets supporting ad-hoc and recurring decisions.
- Administered the team's SharePoint workspace, managing datasets, access and data availability for stakeholders.

KEY RESULT

- ✓ Automated a time-intensive monthly reporting process, saving **~2,500 hours/year across 5 teams**.

`Power BI` `DAX` `Power Query M` `SharePoint` `Agile (Kanban)`

### Business Intelligence & Contract Management Intern

*EDP Distribuição* · Lisbon · Jun 2016 — Mar 2017

- Built **OBIEE dashboards on the telecontrol grid** that remotely operates and monitors substations and transformation posts: substation downtime, incidents by geographical area, and grid-state KPIs used by management and support teams.
- Supported optimisation of Contract Management processes by standardising procedures and improving information flow.
- Designed and maintained the SharePoint site for Contract Management, enhancing document accessibility and version control.

`OBIEE` `SharePoint` `ServiceNow`

## EDUCATION

### Postgraduate in Information Management

*Specialisation in Business Intelligence & Knowledge Management*

NOVA IMS · Lisbon · Sep 2019 — Sep 2020

Relevant courses: Business Intelligence, Data Mining, Knowledge Management, Big Data Analytics, Data Visualisation.

### Master's Degree in Marketing

Universidade do Algarve, Faro · Oct 2010 — Dec 2015

### Bachelor's Degree in Hospitality Management

Universidade do Algarve, Faro · Sep 2007 — Sep 2010

AGENTIC AI — WORKING CONTEXTS

**Professional · Microsoft Copilot:** chat-based exploration and analysis, plus active integrations across Microsoft 365: Power BI (DAX measures, Power Query M, insight synthesis), Excel, and Outlook.

**Personal projects · Claude Code & Cursor:** AI pair-programming on SQL, Python and ETL pipelines: refactoring, documentation and assisted testing.

**Exploration · Gemini & ChatGPT:** rapid prototyping, code review and pattern exploration in data.
