PROFILE

Data professional with over 5 years of experience designing and implementing end-to-end data solutions. Skilled in building and optimizing SQL-based pipelines, designing data warehouses, and developing automated reporting systems that ensure data integrity and accessibility. Proficient in Power BI, SQL Server, Azure, and ETL workflows using Power Automate and Data Factory.

Experienced in data modelling, validation, and governance practices to support reliable and secure decision-making across the organization.

TECHNICAL SKILLS

Data Visualization & Reporting: Power BI, Tableau, Qlik.

Data Engineering & ETL: SQL, Azure (Databricks, Data Factory), Power Automate, SSMS, SSAS, Excel (VBA), Python, Git.

Methodologies & Tools: Agile (Kanban), CI/CD pipelines, Data Warehousing, Data Modeling, Data Governance, familiar with ITIL framework implementation

Languages: English (C1), Spanish (B1), German (A2)

PERSONAL ATTRIBUTES

Analytical and detail-oriented, with strong sense of responsibility and data accuracy. Reliable, organized, and collaborative, with integrity in handling information and commitment to continuous improvement. .

INTERESTS

Technology, Data, Culture and Nature

PROFESSIONAL EXPERIENCE

Data Analyst / Engineer

CTT - Correios de Portugal

Lisbon (Portugal)

September 2020 – Present

- Designed and maintained SQL Server-based data pipelines and ETL workflows using Power Automate and Azure Data Factory, both similar to SSIS, ensuring accurate and timely data refreshes for Power BI and internal reporting systems.
- Built and optimized complex SQL queries to extract and transform data from multiple operational and transactional systems, improving data integrity and retrievability across departments.
- Developed centralized data warehouse structures supporting decision-making across 20+ departments and 500+ stakeholders, including executive leadership.
- Created standardized and automated report templates and dashboards in Power BI improving consistency and accessibility of key business metrics.
- Designed and deployed an Operational Alarms system integrating near real-time data streams to support proactive service quality actions.
- Collaborated with technical and business teams to assess data requirements, model entities and relationships, and optimize information flow for analytics.
- Used Python within Azure Databricks for data transformation, cleaning, and validation tasks as part of larger ETL workflows, complementing extensive SQL-based data processing and troubleshooting.
- Logged and tracked incidents, service requests, and reporting tasks through ServiceNow (ITSM), ensuring efficient issue resolution and documentation.
- **Key Achievements:**
 - Designed and delivered the company's primary Quality of Service dashboard, used daily by 10,000+ clients and internal stakeholders..
 - Developed a Net Promoter Score (NPS) dashboard that improved visibility of customer satisfaction and guided executive strategy.
- **Technologies:** Power BI, Power Query M, DAX, SQL, SSMS, SSAS, Azure (Databricks, Data Factory), Starburst, Python, Agile (Kanban).

Data Analyst

Audiogest / PassMúsica

Lisbon (Portugal)

January 2019 – August 2020

- Designed, optimized, and maintained SQL-based ETL processes and Power BI data models to centralize data from Management, Operations, HR, and Legal systems.
- Automated reporting pipelines and data refresh cycles, improving report reliability and reducing manual maintenance time.
- Developed interactive dashboards and paginated-style reports in Power BI and Qlik, ensuring consistent access to accurate metrics across departments.
- Defined and documented KPIs and data structures in collaboration with stakeholders, enhancing analytical alignment with business objectives.
- Ensured data integrity and accessibility through validation checks and standardized naming conventions across datasets.
- **Key Achievements:**
 - Reduced reporting workload by over 100 hours per year through SQL optimization and automation.
 - Streamlined Rights Distribution data processes, improving accuracy and timeliness for management reporting.
- **Technologies:** Power BI, Power Query M, Dax, SQL, Excel, VBA, Qlik
